Text

Inumbrina opens with an innovative pulley system, with a simple rope you raise the canvas and create shadow. The parasol has a hexagonal or octagonal shape, depending on its size. Unlike circular parasols, this grid creates a canopy of shade and is very space efficient. When placing several sunshades next to each other, freestanding or in a table, the shape ensures optimal space between the parasols - no gaps at all.

The icing on the cake? Due to its smart design, you won't be bothered with any of the annoying parts: no ribs, rods, ropes or slats. The technical components are located above the fabric instead of underneath, what's left is a smooth, floating canvas; an aerodynamic design.

Inumbrina comes in three versions: Inumbrina large perfectly pairs with Gargantua or Pantagruel, Inumbrina medium combines wonderfully with our Anker collection.

We have designed a cover with a rod that allows you to easily pull it over the parasol without having to climb on the table. You pull the cover over the closed parasol when you are not using it and especially when strong wind is expected.

- Center-pole parasol
- Available in 2 sizes (medium and large)
- Umbrella cloth available in white, taupe and black
- Exceptionally strong and aerodynamic umbrella
- Extremely wind resistant, up to 6 Beaufort, due to the flat shape & high tension
- Innovative and minimalist design
- The technical parts are above the umbrella canvas
- UV-resistant umbrella cloth that is also water and dirt repellent
- Closing and opening have never been easier thanks to the ingenious pulley and rope system
- Durable materials: stainless steel and hi-tech polyester fabric
- Including parasol protection cover
- Inumbrina large combines perfectly with Gargantua or Pantagruel picnic table. Inumbrina medium can be combined with Anker and all Virus tables.
- Inumbrina small closes perfectly over a high table, such as our Abachus cocktail table.
- Optional: floor fastening
- Optional for Inumbrina medium: parasol base standard and heavy duty
- Optional for Inumbrina large: concrete base and concrete wheel base
- Optional for Inumbrina large: connection piece for Gargantua and Pantagruel
- Optional for Inumbrina medium: connection piece for Anker

More information: www.extremis.com/en/collections/inumbrina

Construction

- Parasol cloth is made of hi-tech polyester
- The pole is made of stainless steel 303 and 304
- Parasol cover is made of polyester
- The optional parasol base is made of galvanized steel (for Inumbrina small and medium) and of concrete (for Inumbrina large)

Materials info

Umbrella cloth in high-tech polyester fabric:

- High UV color fastness (7/8 - ISO 105-B02)
- Fade resistant
- Ultra strong
- Low weight
- High tear strength

- Long-term appearance
- Water repellent
- The fabric has a water column of 350 mm (EN 20811)
- 0,37 mm thickness
- 250 g/m³ density
- Suitable for outdoor use
- Easy to maintain

Stainless steel parasol pole:

- The diameter of the pole of the Inumbrina large is ø48 mm.
- The diameter of the pole of the Inumbrina medium is ø35 mm.
- High rust resistance
- Periodical maintenance required
- 2-5 mm thickness
- 8,00 10³kg/m³ density
- Suitable for outdoor use
- Very good UV color fastness
- Flame retarding NEN-EN 13501-1 A1

Parasol base in hot dip galvanized steel for Inumbrina medium:

- Parasol base - standard : 724 mm diameter x 8 mm height
- Parasol base - heavy duty : 724 mm diameter x 16 mm height
- Most durable method for protecting metal from rusting
- Protective layer
- Very long life span
- 100% recyclable
- Cradle to Cradle Certified™
- Thickness: 2 à 10 mm
- Layer thickness: 50 à 100 micron
- Density: 7,50 10³kg/m³
- Suitable for outdoor use
- Very good UV color fastness; galvanization will however become less shiny when used outdoors
- Flame retarding NEN-EN 13501-1 A1

Concrete base for Inumbrina large:

- Available in 72 cm and a 82 cm version with wheels
- Made under high pressure
- Matt and porous
- 100 mm thickness
- 2,10 10³kg/m³ density
- Suitable for outdoor use
- Very good UV color fastness
- Flame retarding NEN-EN 13501-1 A1

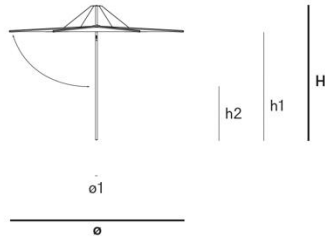

Cover:

- 100% polyester
- Polyuréthane coating
- Water repellent and breathable
- High UV resistance (6-8/8 - ISO 105-B02)

- 0,50 mm thickness
- 240 g/m³ density
- Suitable for outdoor use

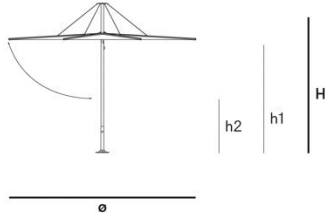

Dimensions

The Inumbrina is available in 3 dimensions

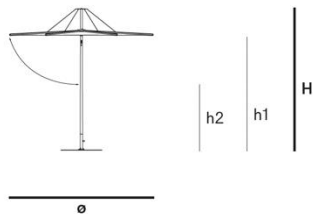

Dimensions (mm)	ø	H	h1	h2	ø1
Inumbrina large	3800	2791	2145	798	48
Inumbrina medium	3200	2501	2015	844	35
Inumbrina small	2500	2501	2035	1198	35

In combination with floor fastening

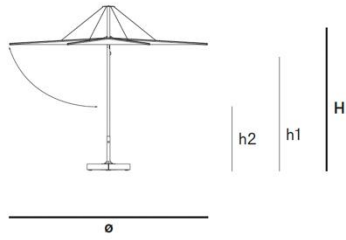

Dimensions (mm)	ø	H	h1	h2
Inumbrina large	3800	2791	2145	798
Inumbrina medium	3200	2501	2015	844
Inumbrina small	2500	2501	2035	1198

In combination with parasol base
Only for Inumbrina medium & small

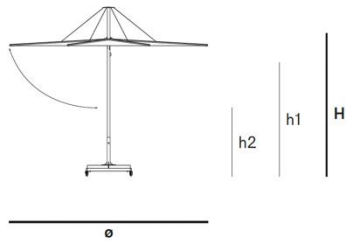

Dimensions (mm)	ø	H	h1	h2
Inumbrina medium	3200	2501	2015	844
Inumbrina small	2500	2501	2035	1198

In combination with concrete base
Only for Inumbrina large

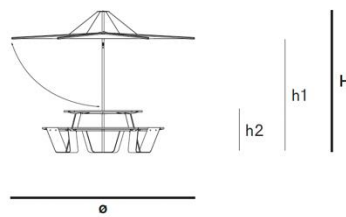

Dimensions (mm)	ø	H	h1	h2
Inumbrina large	3800	2904	2257	910

In combination with concrete wheel base
Only for Inumbrina large

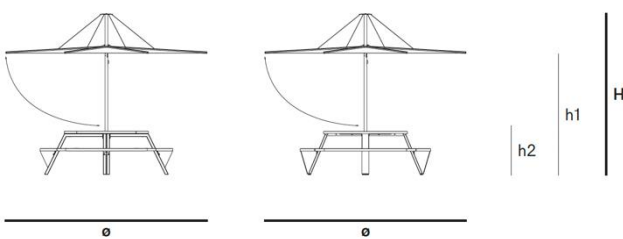

Dimensions (mm)	ø	H	h1	h2
Inumbrina large	3800	2981	2335	988

In combination with Anker
Only for Inumbrina medium

Dimensions (mm)	ø	H	h1	h2
Inumbrina medium	3200	2501	2015	844

In combination with Gargantua & Pantagruel
Only for Inumbrina large

Dimensions (mm)	ø	H	h1	h2
Inumbrina large	3800	2791	2145	798

Weight and transport volume

- Inumbrina large: 0,21 m³ volume – 23,00 kg net weight
- Inumbrina medium: 0,20 m³ volume – 16,30 kg net weight
- Floor fastening large: 0,06 m³ volume – 3,3 kg net weight
- Floor fastening medium: 0,01 m³ volume – 1,2 kg net weight
- Parasol base standard: 0,03 m³ volume – 26,2 kg net weight
- Parasol base heavy duty : 0,05 m³ volume – 51,2 kg net weight
- Concrete parasol base: 0,15 m³ volume – 123,8 kg net weight
- Concrete parasol base with wheels: 0,23 m³ volume – 138,30 kg net weight

View more details on the technical factsheet at www.extremis.com/en/product-downloads

Standards

- Flame retarding NEN-EN13501-1 A (stainless and hot dip galvanized steel)

Certificates

- Windtunnel tests

Warranty

The entire Extremis collection has a 2-year warranty, based on the provisions in our general guarantee terms & conditions.

Maintenance

Umbrella cloth:

For stubborn stains, first use a brush to remove encrusted dirt. Spray Extremis multi-cleaner or a mixture of water and hand soap. Let it act for a few minutes. Rub on the stains with a soft brush. Be extra careful at the seams! Rinse with water.

Still dirty? Washing in the washing machine can be a solution. Remove the umbrella cloth from the structure. Machine wash on a delicate program with a normal dose of mild detergent. (Add a small dose of bleach in case of severe mold or mildew.) Allow the cloth to air dry. Place the umbrella cloth back on the structure or store it in the cover (when it is completely dry).

Cover:

For stubborn stains, first use a brush to remove encrusted dirt. Spray Extremis multi-cleaner or a mixture of water and hand soap. Let it act for a few minutes. Rub on the stains with a soft brush. Be extra careful at the seams! Rinse with water.

Parasol pole:

It is inevitable that the surface will scratch over time, even with normal use. Staining is also possible, but this can usually be remedied with commercially available stainless steel cleaners. Remove stains or encrusted dirt with a cloth or brush. Clean with a dry cloth and some stainless steel cleaner and protector. We recommend using a stainless steel cleaner and protector (available in DIY stores) because you provide the surface with a dirt-resistant protective layer.

Applications

- Indoor
- Outdoor
- Residential
- Businesses
- Hospitality
- Educational institutions
- Healthcare
- Public spaces

Assembly
